

Call-Out for a solidarity-manifestation in front of the Köln-Ossendorf prison and international solidarity actions

With the arrest of two other Hambach Forest activists, the repression wave against the anti-brown-coal movement has reached a new summit.

Mr. Blue, who refused to give his identity to the police at his arrest (and until now), is imprisoned since the 7th of October. He was arrested during a blockade of one of the main conveyor belts of the open cast mine Hambach, and through this shutting down the coal mining. Mr. Blue is not allowed to see the prison doctor since he is imprisoned.

Florian and another activist, whose name is not yet published, were arrested on the 22nd of October by RWE securities in the Hambach Forest, the situation is still unclear. Though they one of them had a broken nose and missing teeth, also they were refused to see a doctor.

The prisoners are now imprisoned on remand, and we can't predict how long it will go.

We want to make people aware of this brutality!

We hereby invite everyone to participate in a solidarity manifestation in front of the Prison in Köln-Ossendorf, on Friday, the 6th of November, 4 PM. Furthermore, we call out for all persons who feel connected to our struggle to solidarity actions. Do actions in your city - prisons, buildings of RWE or other energy companies, German embassies... there are many targets!

This is not „only“ about the protection of one of the oldest forests in Europe. Brown coal is the most inefficient energy-carrier, and the biggest CO2 source in Europe. This massively supports climate change which has driven thousands of people from their homes and will continue to do that.

This struggle concerns us all! Not only those, who are imprisoned, hurt or beaten up by companies or police. We can't let this scare us! Inform yourself and others, come to the manifestations or organise your own actions.

Free the T(h)ree!
